

How to Bluetooth a file (share a file with another Bluetooth device)

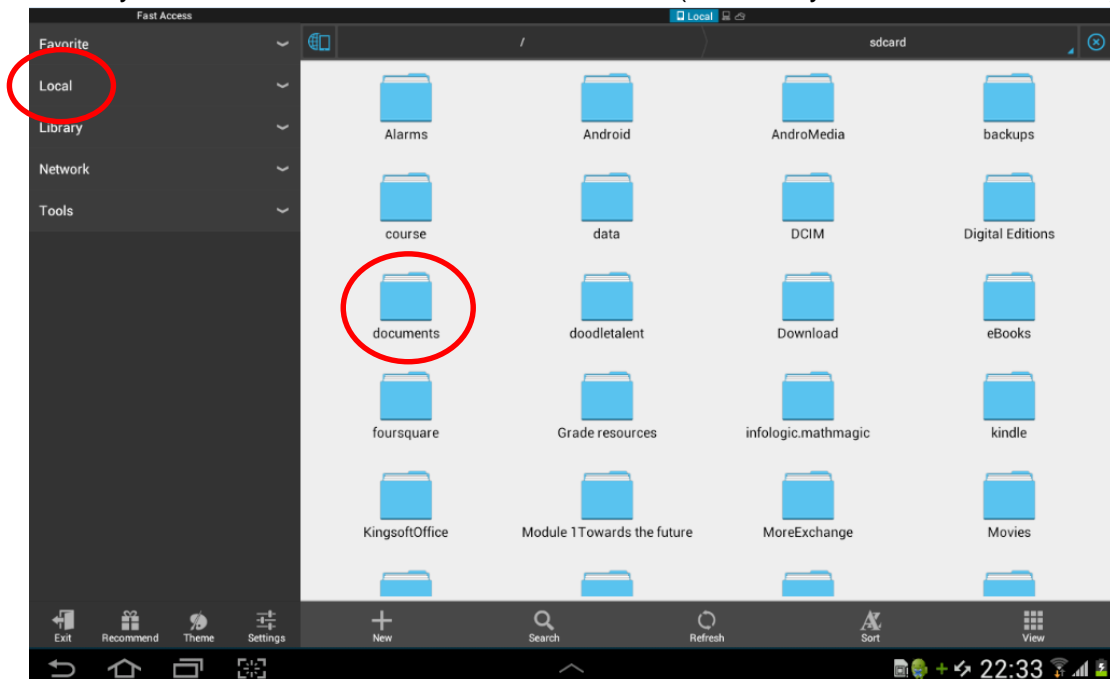

1. Touch and open the **apps menu** in the top right and corner.

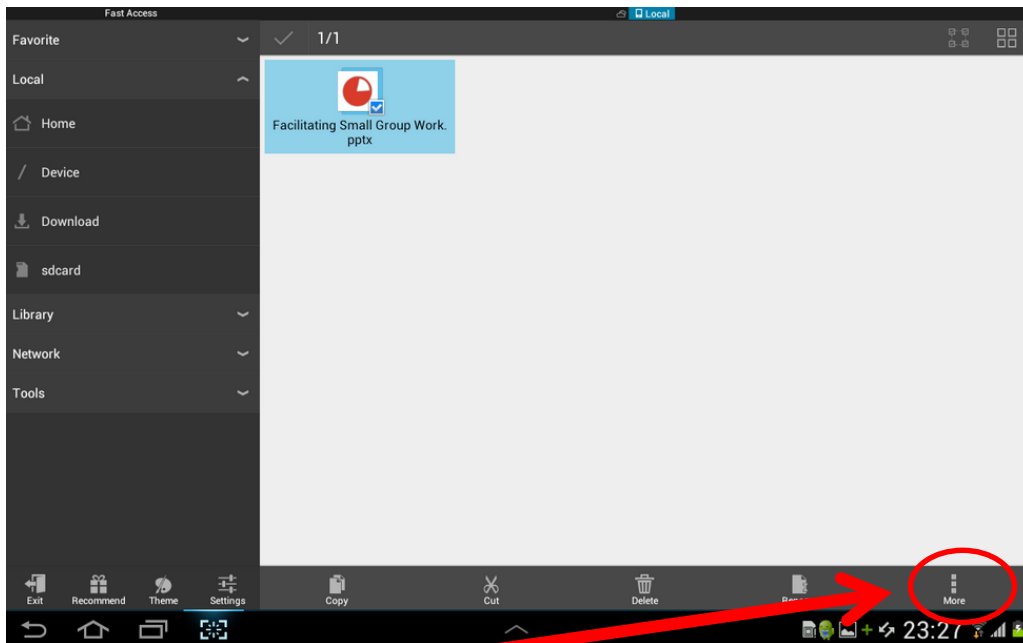

2. Touch and open the ES File Explorer app

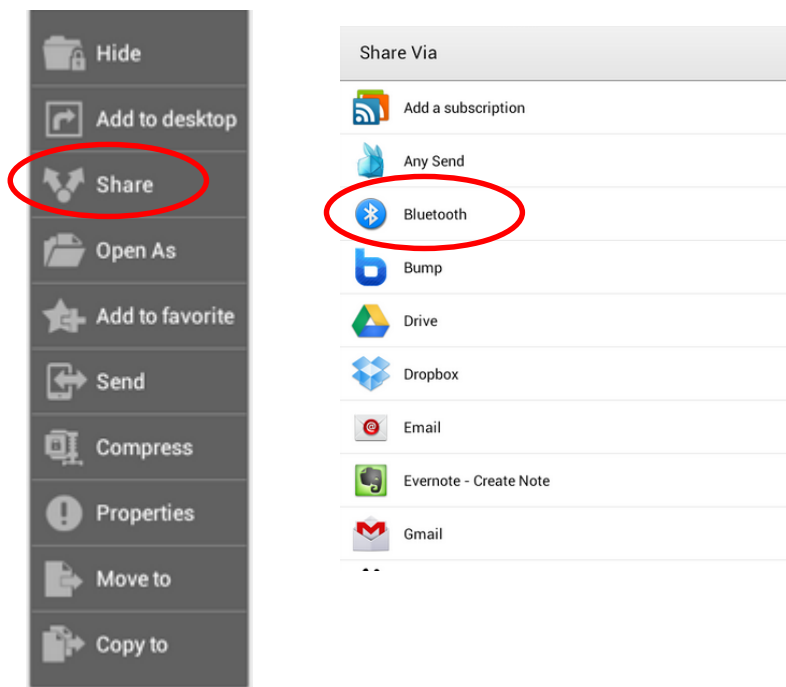

3. Touch your **local** folder → SD card → Documents (or where you have saved the file)

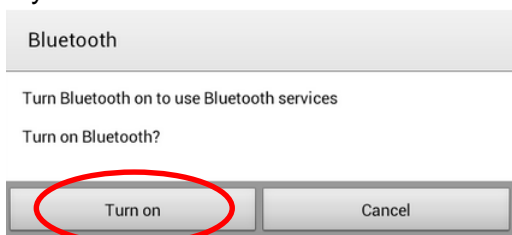

4. Touch to open the folder until you see your file that you want to share.
5. Press hard on the file until it makes a blue block and has a tick in in

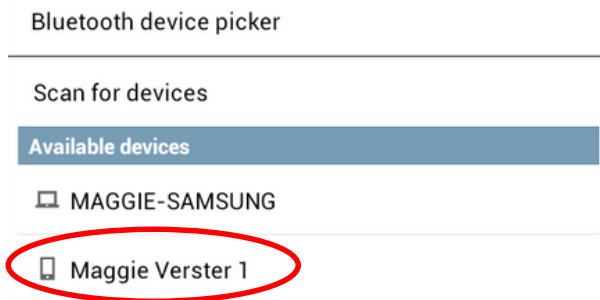

6. Touch More at bottom right
7. Choose Share --> Bluetooth

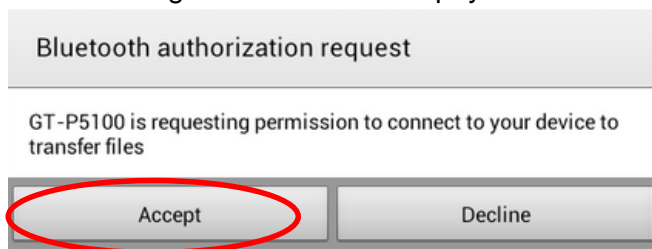

8. If your Bluetooth is not turned on it will ask you to do so

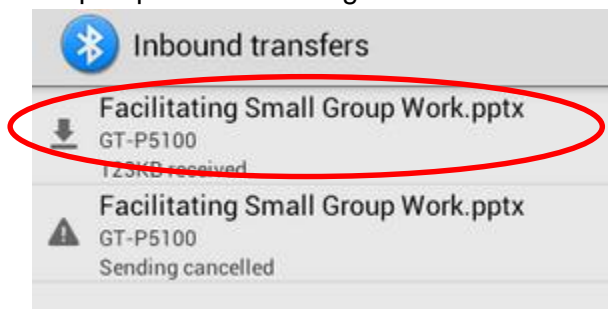

9. Touch the device name to whom you want to send the file to

10. The receiving device has to accept your file

11. Swipe up from bottom right and touch the file that was send to open it

12. All bluetoothed files can be found using ES file Explorer under the folder called Bluetooth
