

How to install and uninstall apps

Install an app from the Google play store

1. To install an app from the Play Store you need to have internet access.
2. Open apps (top right hand corner) and either:

- touch the Menu shortcut → **Play Store** or

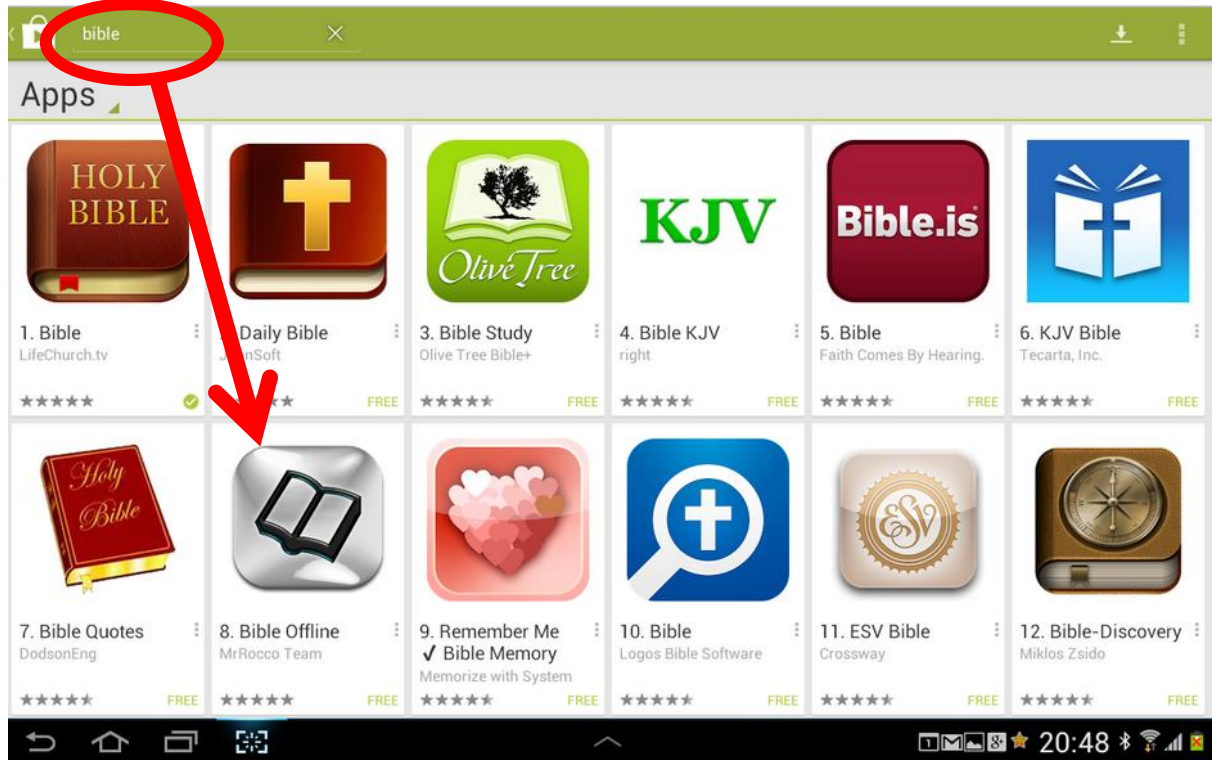

3. touch the **Play Store** shortcut in the apps screen.

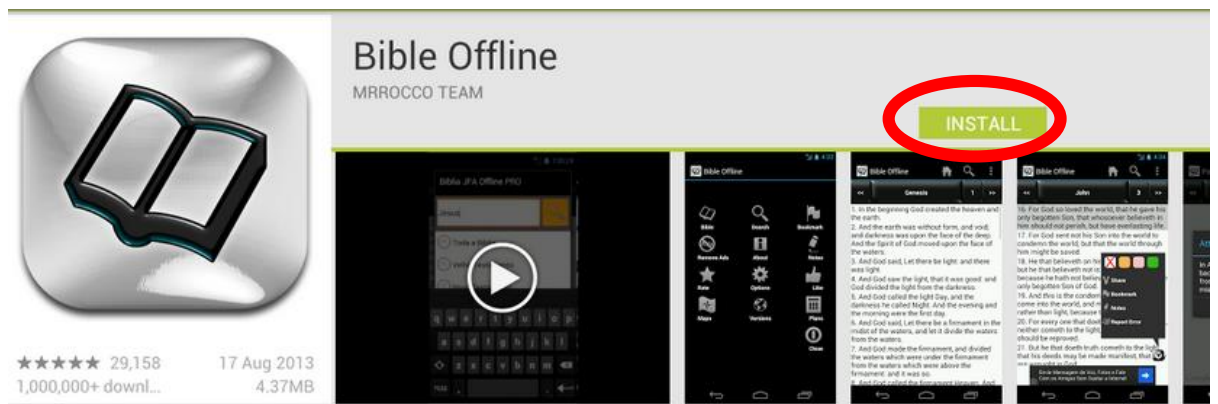

4. If you do not have a Google account create that first or if you are not signed in, sign in with your gmail address and password.
5. Search for the app that you would like to install (top right)

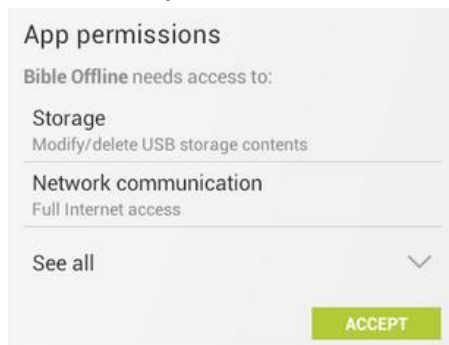

6. Type in the app name and choose that app that you want to install.

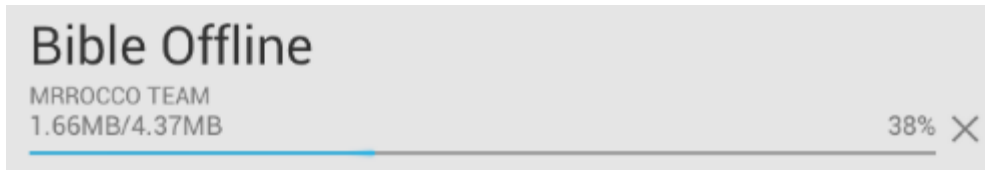

7. Click on **Install**

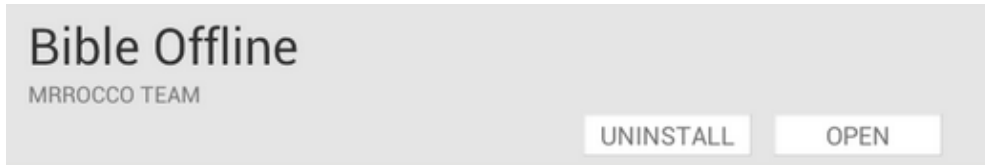

8. Click on **Accept**

9. It will download onto your tablet

10. Open the app or find it in under apps

Un-Install an app from your tablet

If you install too many apps your tablet will become slow and unusable, so make sure that you remove the apps that you are not using.

1. Open your apps screen

2. Touch the apps menu in the top right corner → **Uninstall**

3. You will notice that all the apps have little minus signs in the corner

4. Touch the app that you want to uninstall, you will see a warning window → choose **OK**

5. Click on the return icon in the bottom left hand corner
