

How to transfer files and folders between your tablet and USB drive (Prestigio)

1. Connect your USB (flash) drive to your tablet using an OTP (on the go) cable.

2. Open the ES File Explorer app.

3. Click on **Local** on the left hand side

4. Look for **usb_storage** and click on the file/folder that you want to copy/move to your tablet on the right. If it does not show up and it is connected, close ES file explorer completely and open it again.

5. Press down and hold on the folder or file that you want to transfer, until it shows a blue block around it and have a tick mark in the corner.

6. Click on Copy in the bottom taskbar.

7. Navigate to the right place on your tablet where you want to paste the folder/file (e.g. by clicking on **sdcard** (on the right) → Educational Resources → Course)

8. Make sure that you are in the place where you want to copy your folder to and click on **Paste** in the bottom taskbar.

9. You will see the files/folders in the right hand window.
